

As the pace of technological and business activities becomes ever faster, it is becoming more difficult for manufacturers to ensure that they are operating at the leading edge. Max-Serv has been established as an online service which enables busy operators to rapidly carry out a health check on Manufacturing Excellence, and if necessary, move into a programme of upgrades.

Fact

The European Process Industries' competitiveness is only average when compared to World Class.

Fact

Less than 4% achieve World Class performance in the majority of measurement parameters.

Fact

A first estimate of the potential for increased sales is €160 billion per year.

Fact

The bottom 25% of European companies receive only 50% of their supplies on time.

Fact

The bottom 25% of European companies require more than twice as many indirect employees as do the best.

What we can do for your
Manufacturing Excellence..

We can:

- *Highlight where you are good and bad*
- *Suggest how to make improvements*
- *Support you in undertaking a programme of upgrades*
- *Pinpoint experts to help you implement improvements*

You can take advantage of Best in Class developments by others and strive to exceed them. Our services extend to three levels:

- Level 0* Preliminary self-evaluation by interacting with our website.
- Level 1* A more detailed online evaluation with feedback from our experts.
- Level 2* A full quantitative examination to assess all your manufacturing capabilities.

Services

Gap Analysis

We report our findings in an easily digestible form as upper, median or lower quartile performance on an evaluation scale - with direct comparisons to World Class equivalents.

Strategy for Action

Following a level 2 benchmarking, we will examine how and where improvements may be made in your particular operation. We will provide detailed recommendations for each area, prepared by relevant experts.

World Class Technology

Max-Serv maintains a watch on technology developments surrounding Manufacturing Excellence. Its team of complementary experts review emerging possibilities and evaluate them for cost effectiveness. The information may be accessed through the website.

Gallery of Suppliers

On the Max-Serv website, we present a listing of recommended technology suppliers and case study examples of actual achievements made in industrial applications.
